**WELCOME TO OUR TRAILS**

The Evansville Area Trails Coalition is pleased to provide this brochure of the newly expanded walking/bicycling trail network for recreation and active transportation in our community. These greenways and pathways are free to all for all ages, and we believe they’re a great addition to our quality-of-life and quality-of-place.

There’s a great way to improve your health, connect with friends, connect with nature, and ‘go green’ by driving less.

Trails and greenways help create a ‘built environment’ that promotes physical activity, which is very important in this era of obesity and sedentary lifestyles. The Coalition has shown that if people have the opportunity to walk and ride bikes safely in their community, they take advantage of it. That want opportunity! Trails provide it.

Our goal is for a comprehensive network of trails and greenways throughout our community—a network of safe, scenic pathways connecting our neighborhoods, parks, workplaces and more. We believe it would make the Evansville area the region’s coolest place to live, work and play!
